Household Cleaning & Sanitizing

Cleaning and sanitizing your household after an emergency is important to help prevent the spread of illness and disease.

Using Cleaning & Sanitizing Products
First, wash surfaces with soap and warm, clean water to remove dirt and debris. Next, sanitize surfaces with household bleach.

It is critical to read and follow the safety instructions on any product you use. Below are the most important safety guidelines when using sanitizing products:

- **Never** mix bleach with ammonia or any other cleaner.
- Wear rubber or other non-porous boots, gloves, and eye protection.
- Try not to breathe in product fumes. If using products indoors, open windows and doors to allow fresh air to enter.

Cleaning & Sanitizing with Bleach
Use regular unscented household bleach and follow the instructions in the chart below.

Recommendations for Cleaning and Sanitizing Various Surfaces with Bleach and Water

<table>
<thead>
<tr>
<th>Area or Item to be Cleaned</th>
<th>Bleach Amount</th>
<th>Water Amount</th>
<th>Cleaning Steps</th>
</tr>
</thead>
</table>
| Food surfaces that may have touched flood water [Examples: countertops, plates] Note: Throw away wooden cutting boards, baby bottle nipples, and pacifiers | 1 teaspoon (5 mL) | 1 gallon     | 1. Wash with soap and warm, clean water.  
2. Rinse with clean water.  
3. Sanitize using a mixture of 1 teaspoon (5 mL) of bleach per 1 gallon of clean water.  
4. Allow to air dry. |
| Food cans that are not bulging, open, or damaged                                           | 1 cup (8 ounces) | 5 gallons    | 1. Remove can labels.  
2. Wash cans with soap and warm, clean water. |
